WORK EXPERIENCE

Knowledge Streams | MERN Stack Developer/Trainee   (*Jul 2024 – Present*)

- Gained experience as a **MERN Stack Developer**, acquiring hands-on proficiency in this Stack, focusing on developing and maintaining websites to optimize user experience.
- Designed and implemented responsive, user-friendly interfaces utilizing **React.js**, **Redux** and **Tailwind CSS** adhering to modern UI/UX design standards.
- Engineered scalable server-side solutions with **Node.js** and **Express.js**, leveraging **MongoDB** and **PostgreSQL** for effective data management.
- Developed and rigorously tested **RESTful APIs** with **Postman,** ensuring robust and seamless integration between frontend and backend architectures.
- Developed **Soft skills**, including communication, teamwork, and problem-solving, enhancing overall professional effectiveness.

PROJECTS

Employee Management website:

- Developed an Employee Task Management System using **React.js** and **Tailwind CSS**, providing an intuitive interface for administrators to manage employee tasks and monitor progress.
- Implemented task management features such as task assignments, status updates, and completion tracking for streamlined workflow management.
- Leveraged **Browser local storage** for efficient and secure storage of employee data, ensuring a lightweight and seamless user experience.

To-do-App:

- Developed a fully functional To-do List application using **React.js,** enabling users to add, update, delete, and read tasks with an intuitive and responsive user interface.
- Implemented a modern and visually appealing design using **Tailwind CSS**, enhancing user experience through responsive layouts and customizable components.
- Utilized React **State management** and component lifecycle methods to ensure efficient rendering and management of to-dos, resulting in a smooth and interactive application experience.

Project Manager website:

- Developed a Project and Task Management System using **React.js** and **Tailwind CSS**, enabling managers to upload and organize future projects and their associated tasks.
- Implemented task management features allowing managers to **create**, **update**, and **edit** tasks linked to specific projects for efficient planning.
- Designed a user-friendly interface to streamline project tracking and task modifications, ensuring an intuitive experience for managers.

CORE SKILLS

Programming Languages: JavaScript, C++,
Developer Tools: GitHub, VS code
Frameworks: React.js, Angular.js, Express.js
Databases: PostgreSQL, Mongo DB

EDUCATION

PMAS - Arid Agricultural university, Rawalpindi
Bachelor's (Final Year), Computer Science, 3.25(CGPA)   (2021-Present)
